

Mohammad Youssef

Beirut, Lebanon | +961 76 029 727 | mohyoussef029@gmail.com | [Linkedin](#) | [Portfolio](#)

Career Objective

Computer & Communications Engineer with experience in software development, embedded systems, REST APIs, and hardware-software integration. Skilled in C/C++, ESP32, FreeRTOS, Node.js, PHP, SQL, Docker, and real-time systems.

Experience

Software Engineer | ITXI, Beirut, Lebanon

Jun 2025 – Aug 2026

- Design, develop, and maintain secure, production-grade full-stack software applications, aligning with rigorous departmental coding standards.
- Architect and optimize WordPress robust API integrations and backend services, improving application performance, responsiveness, and scalability.
- Build and execute automated testing frameworks and comprehensive test plans, successfully reducing reported software defects by 35%.

Software Developer Intern | Lebanese International University

Jun 2024 – Aug 2024

- Developed a PHP/MySQL asset management system supporting 1,000+ devices.
- Built backend services and optimized database queries for performance and reliability.

Education

Lebanese International University

Beirut, Lebanon

M.Sc. Computer & Communications Engineering — Sep 2025 – Jun 2027

B.Sc. Computer & Communications Engineering — Sep 2021 – Jun 2025

Projects

EleSystem – Smart Elevator & Building Management System

- Designed and engineered an end-to-end smart management platform combining local hardware logic with cloud-connected data tracking.
- Built interfaces and monitoring endpoints, maintaining a high eye for detail regarding system reliability and uptime.

Manufacturing Process Control System

- Developed a high-performance simulation system emphasizing advanced computer science fundamentals, multitasking, and resource synchronization..

Skills

- **Embedded:** C/C++, ESP32, FreeRTOS, UART, SPI, I²C, GPIO, Sensors, Motor Control
- **Software:** Java, Spring Boot, Python, JavaScript, PHP, Node.js, Express.js, React, SQL
- **Tools:** Git, GitHub, Docker, Azure DevOps, WordPress, Vivado, Linux, REST APIs
- **Core:** Hardware-Software Integration, Debugging, Problem Solving, System Design
